敬启者:

ElectroFlow Energy Savings System.

We are writing to thank you for the system you installed at Shanghai Square, in November 2000. The system has been working for several months now. It has stabilized the power quality in our electrical distribution system with good results.

After the installation of ElectroFlow system, the power quality has been remarkably improved. The voltage has been stabilized and average power factor reached to over 95%. Our monthly electric bill has been reduced by 20,000 RMB; for that, we extend our sincere appreciation. Thank You!
